-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3722

1. Given a tool shank of a known cross section, it is well within the abilities of one skilled in the art to shape the collet jaws in a manner which will mate with and securely grip that known tool shank cross section. Note especially figures 8-10 and the corresponding discussion on page 2 of Lewthwaite, but see also the configurations of Graham, Knowles, Wadworth, Harrist, and Leland.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. On line 1 of claim 1, the phrase "in particular in the form of a drill rod" does not make it clear if the device is actually a drill rod or not.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dechnik (1075699) in view of GB 2,228,695. Dechnik shows a drill chuck having a shank 5 and an opposite seat having a slot 7 which forms two elastic support/adjustment areas 6. An internally threaded sleeve/fastening component 19 is rotated in order to flex the support/adjustment areas in order to grip or release tool shank 10. Note the cross section of the tool shank in figure 3. It is well known by those skilled in the art to provide collet chucks with various gripping shapes in order to accommodate shanks of a different shape. Figures 1, 4, and 5 of GB '695 show a cutting tool 12 having a shank/supporting component with convergent abutment surfaces 18 and

an opposed contact surface 15. It is considered to have been obvious to have provided the gripping surfaces of Dechnik of a shape which will match the shank of the GB '695 device in order to adapt it to grip a different shape.

5. Claims 2-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning the content of this communication from the examiner should be directed to Daniel Howell, whose telephone number is 571-272-4478. The examiner's office hours are typically about 10 am until 6:30 pm, Monday through Friday. The examiner's supervisor, Monica Carter, may be reached at 571-272-4475.

In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office actions directly into the Group at FAX number to 571-273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account. Please identify Examiner Daniel Howell of Art Unit 3722 at the top of your cover sheet.
